<p>5. Snap it to the bracket. Slide the end caps onto the brackets.</p>	

IMPORTANT INFORMATION

WARNING

ALL WINDOW COVERINGS WITH CORD OR CHAIN

Installation instructions

To avoid strangulation hazard, all internal window coverings with cord/ chain controls must have a child safety device installed where the cord has the possibility of forming a loop of 220mm or longer and it is at a height of less than 1600mm above floor level

To avoid creating a possible strangulation hazard for children, the corded internal window covering must be installed in such a way that the loose cord cannot form a loop of 220mm or longer at a height of less than 1600mm from floor level.

When using a cleat (Style 1) to secure the cord it must be at least 1600mm from floor level because a child is capable of unwinding a cord from a cleat. Please wind cord in a figure 8 dimension as indicated on Style 1 diagram.

A cord guide (Style 2) may be installed lower than 1600mm above floor level if the cord is sufficiently secured or tensioned to prevent a loop 220mm or longer from being formed. If the cord is installed lower than 1600mm from floor level it must be designed to prevent a child from being able to remove the cord.

Making Blinds and Curtains Safer for Children

Blinds and curtain cords can be made safer in the following way:

Attach a Safety Device (enclosed)

Attach a cleat (Style 1) to the wall or window frame 1600mm or higher from the floor away from children or pets and wrap around the cleat.

- 1) Affix cleat with screws as shown
- 2) Wind loose cord around safety cleat

Attach a cord guide (Style 2)

- 1) Affix cord guide with screws as shown
- 2) Secure cord in cord guide at all times

Style 1 - Cleat

Style 2 - Cord guide

'WARNING: CURTAIN AND BLIND CORDS HAVE CAUSED THE DEATH OF YOUNG CHILDREN AND MUST BE INSTALLED SO THAT THEY ARE NOT A STRANGULATION HAZARD. FOLLOW THE INSTALLATION INSTRUCTIONS'.
